Portable by design. Leisure wherever you settle.

FOLLOW + STAY + HEIGHT at home / LOWER + LOCK + MANUAL TOW between stays

01 / Lower, stow and lock

Fold the screen, clear the tray and secure both drawers.
Side grips support two-hand carrying.
Virtual model envelope ≈ 600 × 490 × 500 mm.

02 / Extend the pull handle

Rear telescopic grip + side carry handles.
Following stays disabled during manual transport.
Drivetrain release and handle strength need validation.

03 / Place in the car

Stow the pull handle and secure the body in the boot.
Measure the target car opening, floor and lifting path.
AI scene simulation; no verified vehicle compatibility.

PACK MODE

1 STAY: confirm the table is parked.
2 Clear the tray; stow loose items.
3 Lower the surface and latch it.
4 Lock the drawers; disable following.
5 Extend the handle for manual towing.
6 Use both side grips to load.
7 Secure in the car.

AT THE DESTINATION

Release transport locks → unpack → review the new room → resume leisure.

Next tests: packed mass, grip loading, drawer retention, rolling resistance and target-vehicle fit.

Creator-requested transport extension · proposed hardware and mode logic · original lift-box geometry retained · Blender renders + AI concept car scene
